

Early Childhood Intervention (ECI)

More than **35,000 children in Austin** are living with a special healthcare need. Any Baby Can's Early Childhood Intervention (ECI) program helps children with developmental delays reach their full potential and increase parents' skills to support their child.

Who does Any Baby Can's ECI Program Serve?

We serve families with children from birth to 36 months with a developmental delay, medically diagnosed condition or auditory or visual impairment. The ECI model was built on the understanding that the most effective time to improve a child's ability to grow and learn is before the age of three. ECI helps children reach their full potential and increases parents' knowledge, skills, and ability to support their child's physical, mental, and emotional development.

How We Help

Any Baby Can helps children with developmental delays reach their full potential and increases their parents' knowledge, skills and ability to support their child through in-home services such as:

- Occupational, physical and speech therapy
- Specialized skills training, involving parents working together with their child to improve outcomes
- Home-based medical case management and resource navigation including insurance options, medical systems, school and community resources to create an effective advocacy team
