Early Childhood Intervention

Addressing Developmental Delays

Any Baby Can offers Early Childhood Intervention (ECI) services to help children with developmental or physical challenges reach their full potential.

Through in-home services such as occupational, physical and speech therapy; specialized skills training; resource navigation and case management, our team uses a coaching model to build the child’s skills and increase the parents’ knowledge and ability to support their child.

Early Childhood Intervention Provides:

- Occupational, physical and speech therapy
- Specialized skills training, involving parents working together with their child to improve outcomes
- Home-based medical case management and resource navigation including insurance options, medical systems, school and community resources to create an effective advocacy team

Eligibility Criteria:

We serve families with children from birth to 36 months with a developmental delay, medically diagnosed condition or auditory or visual impairment. To be eligible, your child must meet one of the following criteria:

- Medically Diagnosed Condition
- Auditory or Visual Impairment
- Developmental Delay

About Any Baby Can:

Any Baby Can partners with parents so children can reach their full potential. With a focus on child development, we guide families in building confidence, nurturing healthy relationships, and planning for the future. We envision a community in which all parents feel supported, valued and empowered to ensure their children have the best chance at a bright future.
